## Simon, Davis move on

By Cynthia Neff  
MUSTANG DAILY STAFF WRITER

Gov. Gray Davis and businessman Bill Simon Jr. prevailed in the California primary election for governor last night, as months of campaigning came to an end — at least until November.

Statewide at 11 p.m. Tuesday, with 42.2 percent of the ballots counted, Davis was leading by a landslide for the Democratic Party, with 81 percent of the vote, while Simon collected 48 percent for the GOP. Republican candidate Richard Riordan fell short with 28.7 percent, and Secretary of State Bill Jones brought in 20.9 percent, at press time.

In San Luis Obispo County, all ballots counted at press time. Davis obtained 76.44 percent, and Simon gathered 51.29 percent.

Along with other California voters, Cal Poly students cast their vote for the candidates for governor, Congress and various state and local offices. For some, the decision of who to select for governor was simple.

Mark Felix, a political science senior, said that he sent in his absentee ballot with a vote cast for Simon, whom he's met through activities with the Cal Poly College Republicans.

Jarrett Morris, a recreational administration freshman, signs up to vote Tuesday. There was a voting booth on the second floor of the UU for the state's primary elections.

## Houlgate gets another shot

Poly professor runs for assemblyman again, Krebs prosecutor wins judgeship

By Dawn Rapp  
MUSTANG DAILY STAFF WRITER

Cal Poly professor Laurence Houlgate won the democratic ticket for state Assembly in Tuesday's California primary.

Houlgate, a philosophy professor, took 67.77 percent of the vote, beating Merrily T. Karr's 35.31 percent.

Houlgate will now go on to campaign against Republican incumbent Abel Maldonado for state Assembly in California's 33rd district. Houlgate ran against Maldonado two years ago and lost, but looks forward to running a different campaign.

"It feels great to win the Democratic nomination," he said. "I'm going to emphasize different issues this time. I think we need good, high-wage jobs if we're going to keep our young people here."

Houlgate also plans to push issues such as education and health care. He said he believes people in San Luis Obispo aren't

## Possible contract proposal between CSU, CFA

Agreement puts CFA strike on hold

By Stephen Curran  
MUSTANG DAILY STAFF WRITER

A nearly seven-month-long battle between California State University faculty and administration has finally come to a close.

On Saturday, the CSU Board of Directors and Chancellor Charles Reed unanimously supported the proposals put forward by the CFA's negotiating team. The contract remains tentative until CSU faculty and trustees vote on it, but it meets many of the goals previously in contention, said Phil Fetzer, Cal Poly CFA president.

The agreement achieved nearly all of the CFA's objectives and Fetzer said he expects it will be

passed.

"I think it's a good contract," he said. "It achieved most, not all, of our goals."

Cal Poly history professor Manzar Foroohar was on the statewide negotiating team that reached the agreement Saturday. The main goal of the negotiations was to stop what she called the "erosion of the (CSU system)."

Stopping this erosion will entail hiring more tenure-track faculty, an ongoing problem in the past. This deal guarantees 1,200 new tenure-track faculty next year. Currently, more than 50 percent of the CSU's teaching staff is comprised of lectur-

see AGREEMENT, page 10

## Departments look to students to help allocate proposed fee funds

By Chrystal L. Anderson  
MUSTANG DAILY STAFF WRITER

Student voices will speak volumes in allocation of proposed fees, if the fee proposals pass. Department heads are hoping that student participation will ease the process of incorporating the new fee increase.

But each individual college and department differs greatly on how to create a system, how to systematically select student representatives, and who will work out new systems for money allocation.

Aerospace engineering is one department that has already selected its representatives. Many other departments are still working out the details, or are waiting for the fee referendum to pass before taking action.

In the framework of each propos-

al, there are broad instructions for department heads on how they should form student and faculty advisory committees.

In some cases, the new committees would decide how the money would be spent. In others, the committees will simply propose where the fees should go and when the final decision would be made by the deans.

How to form the committees, though, is ultimately up to the departments, as long as they follow the guidelines set by the proposal.

Some departments are choosing to hold elections for the committee members.

"We called a general meeting a few weeks ago," said Dan Biezad, aerospace engineering department head. "We have elected a chair and a vice chair."

The "Department/Program Fee

Allocation Committee," as named in the engineering proposal, will have at least five students.

Applications for the committee are still available, Biezad said, and only two meetings have been held thus far.

Architecture Department Head Allen Cooper said there is an upcoming meeting where students will be encouraged to participate in the decision-making process.

Students within each department will be responsible for determining and implementing the processes for selecting students to serve on the advisory committee, including the length of the appointment, according to the proposal for the College of Architecture and Environmental Design.

"The thought is that the students

Printing, publishing and packaging, some of the nation's largest industries, may not be able to continue business as usual much longer.

The sustainability of print was the topic of a speech given Monday night by Don Carli and sponsored by the graphic communication department. Carli is the founder of Nima Hunter Inc., a consulting firm, and the creator of a study entitled "Sustainability and the Greening of Print."

According to a pamphlet produced by the graphic communication department, the print industry employs more than 10 million people and generates at least \$1 trillion in annual worldwide revenues. Despite the growing use of electronic mediums such as the Internet and e-mail, the use of paper products in the United States is increasing. According to the 1998 U.S. Postal Service annual report, in 1998 mail carriers delivered 5.2 million tons of bulk mail.

"Far from becoming a 'paperless

society,' our consumption and disposal of printed material — in publications, office communications, signage and especially in packaging — has grown exponentially, and as we know it today, printing's continued growth at such rates is not sustainable," Carli said in a press release.

The printing process is heavily dependent on petroleum, making the pulp and paper industry the third largest industrial user of fossil fuels. Carbon black, used to produce black print, is derived by burning petroleum to make soot, Carli said. The industry is also the largest user of water per ton of product, and millions of trees are turned into paper every year, he said.

At Cal Poly, the issue of sustainability in print is a concern to the graphic communication department, said Harvey Levenson, department head.

"We have been addressing this issue in various classes for years," he said, "but now we are ready to take a really pro-active position in supporting these efforts."

The printing press in the GRC

"Far from becoming a 'paperless society,' our consumption and disposal of printed material ... has grown exponentially, and as we know it today, printing's continued growth at such rates is not sustainable."

**Don Carli**  
founder of Nima Hunter

department uses oil-based ink and standard paper. However, the department recently received a donation of a digital press from Heidelberg, a printing company based in Germany. The new press eliminates the need for chemicals, aluminum plates and film in the printing process and is a step in the right direction, Levenson said.

Carli gave various suggestions for increased sustainability, including increasing cooperation between the print and agriculture industries.

"There are crops that can be used to produce precursors for plastics and other materials that today we derive from petroleum," he said.

Carli brought Natureworks plastic products as an example of a new class

of packaging products. Natureworks is made by Cargill Dow LLC and is a plastic-like material made from a corn base. The FCC designated the material as a new generic fiber, the first new generic classification of the century, according to the company's Web site.

Natureworks has the same attributes as plastic, but is natural and completely biodegradable.

Consumers can help encourage change by investing in companies that are a member of the Dow Jones Sustainability Index, Carli said. The index focuses on sustainability companies and funds.

For more information on the study, visit [www.greeningofprint.com](http://www.greeningofprint.com).

Rate of gonorrhea infections in the United States stabilize

ATLANTA — The national gonorrhea rate has leveled off, the Centers for Disease Control and Prevention reported Tuesday. But health officials say that there are some "unacceptable" pockets in the United States where the rates continue to rise.

Overall, the gonorrhea rate rose 9 percent from 1997 to 1999, but stabilized in 2000, the CDC reported. But of the 20 cities with the highest infection rate, 13 continue to have an increased rate.

In 2000, the national gonorrhea rate was 131.6 cases per 100,000 people, a decrease from a rate of 132 in 1999.

In the five cities that already had the highest rates — Kansas City, Mo.; Buffalo, N.Y.; Jacksonville, Fla.; Birmingham, Ala.; and Detroit, Mich. — the infection rate of gonorrhea rose more than 20 percent.

In Atlanta, Washington and Chicago, the rate dropped more than 20 percent. The CDC is planning to study these cities in order to determine which prevention methods were effective.

The sexually transmitted infection can be diagnosed quickly and treated with antibiotics. But if it is not discovered or is left untreated, the infection can cause chronic pelvic pain and infertility, or even facilitate the spread of HIV.

— Associated Press

New phone number lends a hand to overloaded 911 centers

WASHINGTON — In an effort to reduce the number of unnecessary calls to 911, more than two dozen cities and counties nationwide have implemented 311, a non-emergency phone number for citizens who need help or information from police departments and other government agencies. In California, San Jose is setting up a new system, while Los Angeles, Orange County, Pasadena and South Pasadena are developing or considering a 311 system for their communities.

Following the Sept. 11 terrorist attacks, 911 numbers were swamped, and callers would hear busy signals instead of speaking to a dispatcher. People called 911 numbers when worried about terrorist attacks, when there were strangers in their neighborhood, or if they found a white substance in the mail.

The non-emergency call centers generally operate 24 hours a day and take requests for help only inside their jurisdictions. Employees of the 311 systems are also trained to handle 911 emergencies.

Baltimore was the first city to implement a 311 system, in 1996. In two months, 42 percent of 911 calls went to 311, which improved emergency-response times.

In 1997, the Federal Communications Commission set aside the phone number nationwide, specifically for the purpose of

a non-emergency aid system. In 2000, the numbers 211 and 511 were set aside for social-services calls and traffic information, respectively.

Middle East

SOW, Afghanistan — A village in Northern Afghanistan may soon be completely submerged. Floodwaters have been rising slowly in the town, due to a river that became clogged by debris that was sheared off an adjacent mountain from last weekend's powerful earthquake in the Middle East. At least 100 people were buried when the rubble fell. So far, four bodies have been recovered. About 100 mud-brick homes, a mosque and a cafe were also demolished by the tons of fallen rock.

Villagers spent much of Tuesday trying to salvage belongings and timber beams from their flooded homes. About 300 homes have already been submerged or collapsed when their bases eroded, said village elder Abdul Qodoos. If the river is not unclogged, all 1,000 of the village's buildings could be underwater within two days.

Twenty-two tons of food were airlifted to the village of Zow by helicopters from the U.N. World Food Program late Monday. U.N. officers will also send earth-moving equipment, said a U.N. spokesman. Other non-governmental organizations are also driving to the area to administer aid.

The U.S. Geological Survey said the 7.2-magnitude earthquake was the region's strongest since its 7.2

magnitude earthquake in December 1984.

A total of 10 people in other parts of Afghanistan also died due to the earthquake.

— Associated Press

Middle East

KARACHI, Pakistan — A high court in Pakistan ruled out a petition asking for the extradition of Ahmed Omar Saeed Sheikh to be blocked. Sheikh is the chief suspect in the kidnapping and murder of United States journalist Daniel Pearl. His wife filed the petition last week.

The United States requested Pakistan hand over the British-born militant. Sheikh has claimed to be the mastermind of the abduction.

There was some debate as to whether extraditing Sheikh would violate Pakistan's national laws. Government lawyers and judges determined that the extradition could be done without contravention of the law.

Pearl was a 38-year-old journalist for The Wall Street Journal. He was kidnapped in Karachi, Pakistan, on Jan. 23. A videotape of his death by beheading surfaced one month later.

Pakistan said that while it will consider extradition, it will also reserve the right to try Sheikh in domestic courts.

The United States has no extradition treaty with Pakistan, but lawyers may find a legal way for Pakistan to hand Sheikh over.

The United States has offered a \$5-million reward for information leading to the capture of Pearl's killers.

— BBC News

South Pacific

COOLUM, Australia — Tuvalu, a tiny island nation northeast of Australia, is under threat of sinking as sea levels rise due to climate change. Within 50 years it could be totally washed away, said Tuvalu Prime Minister Koloa Talake.

Talake has announced that Kiribati and Maldives, two other island nations in the area, may join Tuvalu and take legal action against major polluting countries. Australia would be the major target of action in the International Court of Justice.

At a Commonwealth Heads of Government meeting in Australia on Sunday, Talake has claimed that the islands have already been partially submerged, disputing scientific studies that suggest there has not yet been any discernible rise in sea levels.

The country of Tuvalu is a group of nine tiny islands with a population of 11,000 and covers a little more than 16 square miles. No point on the islands is more than 14-feet, eight-inches above sea level.

Tuvalu has hired two law firms from Australia and the United States to look into taking action against the countries considered most liable for the greenhouse gases that are blamed for global warming.

Tuvalu is considering taking action against tobacco, oil- and car-manufacturing countries in addition to the country of Australia.

getting the right access to health care because of the lack of doctors in the county. He also argued that the state needs to reduce the costs of education and doesn't understand why the state can't pay for more.

"When we pay for young people's education, they're paying us back later on," Houlgate said.

One of Houlgate's main concerns is the high cost of tuition at all universities. He said the fee increases need to stop and actually be reduced. California needs to prepare for a rapidly growing population, and that needs to be done at the state level, he said.

In other local races, John Trice won the position of Superior Court judge for San Luis Obispo County on Tuesday, beating out six other candidates. Trice is best

known for prosecuting Rex Krebs in the double-murder trial last year.

Trice won the ballot with 39.36 percent of the vote. Many county officials had believed Trice would run for Superior Court judge if he successfully prosecuted the Krebs case.

Jack O'Connell won the position for state Superintendent of Public Instruction, taking 68.28 percent of the vote. O'Connell is the former 18th district state senator, representing Santa Barbara, San Luis Obispo and western Ventura counties.

Other wins included Bruce McPherson for the Republican nomination for lieutenant governor. McPherson received 87.57 percent of the vote. The Democratic nomination went to Cruz Bustamante, who ran unopposed and obtained 97.99 percent.

For a list of all local race results, visit [www.slonet.org/~clerkrec/](http://www.slonet.org/~clerkrec/).

## GOVERNOR

continued from page 1

"He's the best candidate out of the three Republicans," Felix said. "He's a businessman, and we need that kind of person to get California turned around."

Felix blames Davis for California's \$20 billion deficit.

"We need California to be run like a business to get us back on track," he said.

Whitney Market, a business junior, said her vote was also for Simon.

"He's economically Republican, but socially liberal," she said. "That's why my vote is with him."

While some Cal Poly students took an active interest in voting in the primaries, others did not.

"I'm so busy I don't think I'm going to vote," said Peter Skinner, a mechanical engineering junior. "I just moved up here, so I'm not registered in (this county). If I had the time or the interest, I'd look into it."

Charlie Allnutt, a construction management senior, said he would try to vote, if he is registered in San Luis Obispo County.

"It would be kind of sad (if I didn't) vote," he said. "My roommate is vice president of ASI."

Another student said whom she wouldn't vote for: GOP candidate Richard Riordan.

"His ads are all negative," said Maria Garcia, a modern languages and literature senior. "He's just trying to get on (former New York mayor) Rudy Giuliani's bandwagon."

Garcia said she voted for Davis.

Several other students supported the Democratic Party. Chris Thomas, an electrical engineering senior and officer of the Young Democrats, said he also voted for Davis.

"Though I have to vote for the party line anyway," he said, "I think that Davis has done a good job."

This is the first year the state has conducted a "semi-open" primary, in which roughly 2 million unaffiliated voters could have participated in by requesting a partisan ballot, according to the Chronicle. In past years, a blanket primary was employed where registered voters could cast ballots for any candidate regardless of party affiliation.

Young Democrat's Vice President Derek Huerta said he voted for Davis because of what he's done for the state, including his commitment to funding higher education and the increase in test scores from grades K-12 over the past three years.

In regard to Riordan, Huerta said that the candidate "is interesting, because he isn't a very conservative (Republican), and so appeals to a larger amount of people."

If Simon makes it past the primary, Huerta said, Davis would have a much easier time winning, since he views the Republican candidate as more conservative than Riordan, and "voters tend to be more liberal."

The primary race began with three Republican candidates aiming for the chance to face Gov. Davis in the fall. Davis has no major competition for his party's nomination since last year's scandal involving Democrat Gary Condit, D-Ceres, and federal

intern Chandra Levy. Davis spent \$10 million on an advertising campaign against former Los Angeles Mayor Riordan, who then tried to turn the negative advertising to his own advantage.

Simon, the unexpected front-runner on the Republican ticket, might have been helped by Davis' attacks on Riordan. However, his jump in the polls did not help his campaign contributions.

When speaking briefly with reporters Monday, Simon stated his intention to focus on the budget and tax cuts, improving education and the state's infrastructure, according to an article in the San Francisco Chronicle.

The third candidate, Bill Jones, spent Monday campaigning in Sacramento. There, he said he is the only one of the three GOP candidates who has been able to deliver strong leadership in office for 20 years.

Davis continued to support increased per-pupil spending, which raised California from 47th in the nation to 21st, around the national average, according to the Chronicle article. Davis also promoted his system for accountability, which ranks every school in the state and puts the list on the Internet.

Election observers forecasted that 36 percent of the state's registered voters would cast ballots in the primary, according to the Chronicle. That would be the second-lowest percentage in history, ahead of only the 35 percent turnout in 1994.

## California Faculty Association

### California Faculty Association Resolution Against College-Based Fee Increase

- WHEREAS,** Student fees that serve the purpose of increased tuition should be implemented system-wide with the oversight of Trustees, legislature, and the governor;
- WHEREAS,** The California State University planning initiative, "Cornerstones", condemns such funding methods stating, "The artificial distinctions between student fees and tuition mean that campus-based fees have become a back-door vehicle for tapping student revenues. The whole system is manipulated rather than managed, inadequately connected to the financial aid system, and needs to be rethought" (CORNERSTONES, Task Force #2 - "Meeting the Enrollment and Resource Challenge", 3/97);
- WHEREAS,** Eligible students should be entitled to equal access to CSU campuses and to the departments of their choice, regardless of their income status;
- WHEREAS,** Any new college or campus-based student fees will limit students' educational choices;
- WHEREAS,** The Cal Poly administration has not established sufficient accounting, auditing, and reporting systems to assure proper expenditure of the money;
- WHEREAS,** The Cal Poly administration has not given evidence that the Cal Poly Plan \$45 per quarter fee already in place has increased the number of classes or graduation rates. The administration had promised 16 new tenure track positions, but since 1994-95, the number of tenure track faculty has decreased by 1; however, the number of administrators has increased by 35;
- WHEREAS,** The Cal Poly administration is not giving students adequate time or information to make an educated decision; and
- WHEREAS,** The administration has not properly addressed alternative sources of funding; therefore be it
- RESOLVED,** That the California Faculty Association stands against the proposed college-based fee increase; and be it further
- RESOLVED,** That the California Faculty Association urges our faculty and students to demand accountability and transparency as a first step in resolving any perceived budget crisis.

MUSTANG DAILY STAFF WRITER

Nestled between Woodstock's Pizza and Hudson's Grill is a nook offering a quiet atmosphere and delicious, healthy food.

Open five months, Z Pie is a restaurant still new to San Luis Obispo. Owners Kyle and Samadhy Coots own the Z Pie in San Luis Obispo, while Kyle Coots' brother and sister-in-law own the first Z Pie in Placerville, Ca.

"We wanted to come to a college town with a nice coastal community," Kyle Coots said. After traveling to New Zealand and Australia, the family picked up on the potpie idea.

But these potpies have a twist. Chefs at Z Pie have created pies that are more than just potatoes and beef.

Before chowing down on a potpie, one can order a house salad: an organic lettuce blend, with a selection of fresh carrots, cucumbers and tomatoes. Other salads include spinach and Gorgonzola. It is best to order a rich dressing on the side, so that the flavor of the vegetables is not lost.

Another option is the soup of

the day, which ranges from clam chowder to red potato wheat to New Orleans shrimp Creole gumbo. Both vegetarian- and meat-based soups are offered daily.

From Thai chicken to a "very vegetable" potpie, there is something for everyone.

With zesty ingredients such as basil, thyme, oregano, red wine, pesto and olive oil adding unusual flavors, it is a delightful experience to eat something flavorful in the form of a potpie ... especially since the recipes offer different tastes from around the world.

For fish lovers, there is Mediterranean salmon with tomatoes, mushrooms, black olives, olive oil, lemon juice, capers, garlic, red wine and sun-dried tomatoes. All pies are in a mouth-watering, crunchy bread crust.

Potpies are made throughout the day, so, they are hot and ready to go for those dining in, or frozen (avail-

ERIC HENDERSON/MUSTANG DAILY

Various potpies roast in the oven at Z Pie, open Sunday through Thursday from 11 a.m. to 9 p.m., and Friday and Saturday until 10 p.m. The restaurant is located at 1060 Osos St between Hudson's and Firestone Grill.

able in quantities of six) for those who want to take them home.

Offering a relaxing atmosphere, the dining area is filled with wicker chairs with comfy cushions, dim lighting, wine racks and local artists' work. Since the restaurant is situated slightly underground, there's a feeling of being in a wine cellar that provides the quirky atmosphere of an art gallery.

Z Pie is a great date place, since it allows for quiet conversations with a friendly atmosphere. It's also perfect for lunch, since the pies are somewhat small compared to the

average burger and fries at Hudson's Grill. When leaving, you don't feel overly stuffed with high cholesterol.

There's enough room for the affordable desserts on the menu: baklava with vanilla ice cream, brownies, ice cream and other dessert specials. Another idea for those with a sweet tooth is to order the "caramel pippin apple," a potpie filled with apples, brown sugar, butter, vanilla, lemon and spice.

The prices are definitely adequate for college students. For \$8, one can order a pie, house salad

and drink. Otherwise, the pies range from \$4.75 to \$6.25, allowing dinner for two to average between \$15 and \$20.

Adding to the fresh atmosphere, iced tea is brewed on the spot. For those accustomed to living on the Central Coast, wine and beer are also offered. Z Pie is open Sunday through Thursday from 11 a.m. to 9 p.m., and Friday and Saturday until 10 p.m. Located at 1060 Osos St., Z Pie is literally a "hot" place to eat, especially if you're just interested to see why the people "down under" like potpies so much.

## Correction:

The Capoeira photographs that appeared in Tuesday's 'Poly Profiles' section were actually pictures of a karate class at the Rec Center. Capoeira classes are offered Mondays and Wednesdays from 6:30 to 8:30 p.m. in the fitness room.

## Fun FOOD Fact:

### Where does Jell-O come from?

Jell-O, the 104-year-old treat that's currently sitting in more than 72 percent of American kitchens, consists of four main ingredients: gelatin, water, artificial sweetener, and food coloring. Gelatin is the stuff that lends Jell-O its weird, not-quite-liquid, but-also-not-very-solid structure.

Now for the sobering news — gelatin is made up of a protein called collagen that's found in cow and pig hides, hooves, bones, and connective tissue. To make Jell-O, collagen is boiled down, chemicals are added, and then the collagen is extracted. So Jell-O is pretty much off limits for a vegetarian diet.

According to the official Jell-O Web site, a box of Jell-O gelatin is sold in the United States every four seconds. Kraft Foods launched a commemorative History of Jell-O site a few years back to celebrate the centenary of America's favorite wobbly confection.

## EATING RIGHT

By Wendi Lelke

Group projects are due, the last round of midterm exams are on, finals are coming up in a couple of weeks, and you are just too busy to sit down and eat a well-balanced meal. In other words, you're "eating on the run." We all do this at some point in the quarter, and for others, all quarter long. But eating on the run shouldn't become a habit for several reasons.

People who eat while in a hurry tend to eat more than if calm and sitting down. Eating too fast may also increase the

bananas, apples, pears, oranges, for example, can be eaten at any time.

Dried fruits and nuts last all day without refrigeration, unlike dairy products such as yogurt and cottage cheese.

Wheat crackers, bagels and pretzels are healthier snacks than the sugar-loaded protein bars.

Restaurant stops may be more challenging to control the extra calories but one can always request to hold the sauce, dressing, mayo, oil or butter. Order broiled, baked or steamed items for the least

Eating too fast may also increase the risk of developing gastric reflux (heartburn) or nausea.

risk of developing gastric reflux (heartburn) or nausea.

On-the-run eaters also tend to eat whatever is around at the time, which usually means fast-food, or processed and prepackaged foods. These items are usually higher in fat and calories, with lower nutritional value than freshly prepared, nutrient-rich foods.

There are some solutions to eating on the run and indulging in not-so-healthy food items. Try some of these tips before you head out the door without a meal plan for the day:

Prepare veggie snacks ahead of time. Peel some carrots and chop some raw vegetables such as celery sticks, peppers and broccoli. Add some peanut butter to keep you satisfied in between bouts.

Cold, fresh sandwiches are a great way to get a vitamin-packed meal without all the added calories and fat.

Pack whole fruit in your bag before leaving the house — choosing the right fruits requires zero preparation;

amount of extra calories. Side-salads, fruit cups, a side of rice and beans or veggies are available at most restaurants, when you're in a hurry.

If you're on campus, you can still satisfy your cravings with healthy foods. The Avenue has yogurt, dried fruits and nuts, salads, made-to-order sandwiches, stir-fry veggies with rice and burritos. Backstage Pizza offers a salad bar so you may create your own salad with garlic bread or breadsticks. Campus Market is a mini grocery store right on campus. It provides a variety of fresh salads and sandwiches, refrigerated foods such as pre-made burritos, frozen foods and breads.

Even though it's that time of the quarter when the world is on your shoulders and you feel like you can't even stop to eat, proper planning and healthy food choices will help your body and mind make it through finals week.

## Tracking down foreigners should be done wisely

Since Sept. 11, we keep learning about government programs to protect our country from future acts of terrorism. With new security measures already in the works at airports, the government is now planning to spend millions of dollars on tracking visas.

Sure, it sounds like a good idea. After all, two of the Sept. 11 hijackers were here on extended visas, and one of the alleged hijackers was here on a student visa and never turned up for class. It's good to take precautions in situations like this and even evaluate those who show up for class and those who over-extend their visas.

With our economy falling due to the last acts of terrorism, the question is: How much more money will the government spend on "protecting the country?"

In October 2001, President George W. Bush signed the USA Patriotic Act, which provides \$36.8 million to set up a computer system to collect current information on the nation's 600,000 foreign students. He also mentioned that the government would intensify its efforts to track down tourists and business travelers who over-stay their visas. That alone is costing the government \$13.3 million in the first stage of an "entry-exit" system that moderates foreigners coming in and out of the country.

With the new budget being released for 2003, Bush has proposed that \$362 million be added to continue building the high-tech computer system. That is a lot of money. Once you compare it to the amount earned by employees doing the dirty work, it seems like even more.

The Immigration and Naturalization Services has 2,000 agents allotted to enforce immigration law in the United States. Therefore, the government is planning to spend a whole lot of money even though it only has 2,000 people to do such a time-consuming, important job.

I still believe that it's a good idea. But it's just an idea. However, I do not think that 2,000 individuals will be able to keep an eye on the hundreds of thousands of people entering our country every day. These people would need to look at individuals with visas, see if their visas have expired, and see if there has been any suspicious behavior.

A recent Department of Justice press release mentioned that \$30.2 billion is set aside for the department. Out of that comes the \$362 million "to fund a multi-year effort to provide a comprehensive land, sea and air entry/exit system for the United States," and the system will provide enhanced information, technology and upgraded facilities along America's borders.

Everything regarding airport security is still not finalized, yet the government is jumping to a new project. Last week's Air India flight should be an example of how airport security isn't even solidified yet. That flight was escorted into New York due to London personnel reporting a suspicious passenger after the flight took off. Part of the reason why things aren't finalized with airport security is that there are not enough people or enough money.

I think President Bush has a superb initiative and that we should check on people with over-extended visas and foreign exchange students who don't show up to school. It seems a little fishy, though, when they are using so much money and don't have the bodies to complete the work. First fix the process of people coming into the United States, and then go from there.

### CLONING ANIMALS = HAND-ME-DOWN PETS!

BY MATT COLÓN

## Cloned cats are creepy

This year, scientists in Texas announced they'd successfully cloned a cat. Genetic Savings and Clone, the company doing the research, hopes wealthy pet owners will use its future service and consequently bypass the grief process of losing a cat. All major media outlets ran a story on the kitten, dubbed CC for carbon copy, who now joins the ranks of mice, cattle and sheep as cloned animals. Since pictures of fluffy kittens tend to be good PR, the public reaction did not delve into the ethics of cloning, but resounded with a big "Awww, how cute." CC is a first because it was cloned, not in hopes of curing cancer, feeding the hungry or producing stain-resistant wool, but in hopes that someone grieving for the loss of their own kitty would shell out thousands of dollars to bring their pet back to life. CC is not a great step forward for newly discovered applications of science, but a crass commercial capitalization on a segment of the population who tends to be a little "off." When a loved one — either two- or four-legged — dies, the best process for healing involves honoring them through ceremony and remembrance, not laboratory work.

### Commentary

But people are really weird about pets. There is a multi-billion-dollar-a-year industry that thrives on those of us who aren't terribly well adjusted. People can buy Chanel sweaters, jewel-

ry, books with pet names, and get both astrological charts and homeopathic remedies made for their cats. I, too, have spent a fair amount of money on "designer mice" for my two cats. I usually purchase such items to ease my feelings of guilt for lack of quality time spent with the kitties. Pets really don't appreciate the money spent on them — do they really prefer a designer mouse to a ball of tinfoil? They appreciate these lavish accessories even less once they're dead.

For a while it was in vogue to freeze-dry your pet, a more life-like representation than traditional taxidermy, but eventually with too much humidity, kitty would start to melt and eventually decompose. These post-mortem applications help people remember their pets every time they gaze at the corner of the living room at the motionless animal — stay kitty, good kitty! And no matter how bizarre those options appear to be, they don't seem nearly as bad as a van full of technicians in white Hazmat outfits interrupting a wake for Fluffy.

GS&C is banking on people who would shell out \$20,000 for a cloned kitten. Even if you're not ready to have your kitty cloned, you can delay the

decision possibly for decades by having its genetic information stored for only \$1,395 (plus \$150 in annual storage charges).

The GS&C Web site has had more than 10,000 hits since the announcement. How many of those were serious inquiries is up for debate, but somewhere someone is putting their dead cat in the freezer just in case they decide to utilize the service.

When one of my cats dies, I will light a candle and pore over pictures of it. I will remember all its little quirks and annoying habits, and the one time it did something funny and cute, and I'll laugh about it. My cats will always live in my memory. I will not find it necessary to bring them back simply because I have the resources. The one constant in life is change, and part of that change involves loved ones departing and new friends entering our lives. Each pet is different in its own unique way, like the experiences of life; and although we'd all love to control what happens, when we do that, we are short-changing ourselves of the larger mysteries and experiences of life.

## Letters to the editor

### Will too little sleep kill?

Editor,

While reading Andra Coberly's commentary on the right amount of sleep ("The right amount of sleep is such a relative thing," March 4), something struck me as funny. The article stated that men and women who sleep eight hours a night were between "12 and 13 percent more likely to die." Maybe I read the article wrong, but if I only sleep six to seven hours a night, am I not going to die? The article also said, "Men who sleep 10 hours a night had 34 percent

greater chance of dying, and women who sleep 10 hours had a 41 percent greater chance of dying compared to those who only slept for six to seven hours." Again, do the people who sleep for six to seven hours have a chance to escape fate and not die?

Katie Rose Hall is an animal science sophomore.

### Club should apologize Editor,

The letter titled "Republican club clears up controversy with fliers,"

(March 5), which was an "official statement" from the CPRC, did not clear up any controversy in my mind, but added to it. Call me a cynic, but I find it hard to believe that the CPRC, the same club which is synonymous with controversy, was innocent in the fact that they just happened to run off copies of the "unapproved" fliers promoting the Reginald Jones talk, and then happened to post them all over the campus. I have to hand it to the CPRC, the fliers were effective, but don't insult my intelligence and the rest of the student body's by pretending this wasn't a

purposeful action. Instead of trying to justify what you have done, you should have taken the time in your "official statement" to apologize to those on campus who were offended by your actions, albeit purposeful or incidental.

Matt Taylor is a history senior.

### See event for yourself Editor,

Isn't it typical of the far left and those who make a career out of attacking Republicans try to spin our great event? The College Republicans brought to campus a dynamic, influential speaker (Reginald Jones) that your tuition would never pay for. We offered another perspective to students for Black History Month. We are depicted as racists; yet, the club is more diverse than the campus. Furthermore, we fund-raised a very large sum of dollars to bring a BALANCE to campus that the school does not offer. We united to make a positive difference on campus. We wanted to bring a BALANCE to the discussion. The event itself was standing room only. Now the discussion is being diverted to some controversial posters. It is so easy to criticize. Can you not just say, "Hey, the crazy Republicans actually brought an interesting speaker to campus?" As for Lilian Andrade, in her March 1 letter ("Fliers were unfair to speaker") critical of our event, it is fairly obvious she was not in attendance. Her tears for Reggie were as fabricated as his supposed offense. Mr. Jones was very impressed with our event, and even more impressed by the receptive audience, where he won over the opposition.

The CPRC club will be showing an encore presentation of the speaking event at our next meeting (March 12), so everyone can come to their own conclusions.

Our Web site has more information: [www.calpolygop.org](http://www.calpolygop.org). Thank you to our supporters, go Bush, and God bless America.

Brent Vann is a political science senior and president of the Cal Poly College Republicans.

### Porn is more offensive Editor,

In response to Barry Hayes, who is "puzzled" over OneTruth sales ("Bookstore should not sell one religion's materials" March 5), it's about free market and profit. There are foundations of America and school bookstores from sea to shining sea. Objective statement: El Corral is

neutral religiously. I'll bet 50 pushups that there are plenty of books and/or magazines advocating other religions and atheism in store.

As a Christian, I despise porn. I'll admit that given the power I would deny the industry all of its rights and kick its fat head, if the industry had a head. Porn is sold at El Corral, and though I ask them to PLEASE CEASE selling porn, they have every right to sell. This despite the documented and obvious effects porn has on men, families and society and the blatant disrespect for women and love. It's inappropriate. Contrast this with OneTruth clothes sales, which cause no harm. No, being offended is not harm! Suck it up, all you politically correct doodie heads. Don't let the fact that someone believes whatever and has an original way to market it on campus upset you. The skinny of it all is there is a big enough demand and no reason for this neutral bookstore not to sell. With enough demand, any religious affiliate would be sold in the next aisle. Other beliefs just need some applied creativity and entrepreneurship. Those little fish with legs are kinda funny, and offensive to boot! Come up with money-making items and they'll sell here. And that's ... OK.

Nainoa Kalama is a business junior.

continued from page 1

will be representing a broader cross-section (of students)," Cooper said. "I want (the students) to know that this is their committee — not the faculty's and certainly not my committee."

Students are in favor of the election, but some have reservations.

"I think it's fair," said Brandon Marshall, an architecture junior. "But it will be the same people who always participate."

Broad student participation in the College of Agriculture is key for its advisory committee. As outlined in the college's proposal, each department will establish an advisory council consisting of five students and two faculty members to provide advice on how to support instructional programs.

The agribusiness department will also use the election process as a way to form its committee, Department Head Ken Scott said.

"It would be my intent to go the election route," he said. "And to

have a suggestion box for students to justify the way they would use the fees."

Agribusiness senior Camille Robertson said students would be given an equal opportunity to participate in the election.

"If the same people always participate in decision making, there would be no new ideas," she said. "This way, students who are less involved can help decide how their money will be spent."

Spending money in the College of Liberal Arts (CLA) will prove to be an intricate process. During the first year, decisions would be made at the department level. It would be up to the department heads to make the final call on how money will be spent, said CLA Dean Harry Hellenbrand.

Each department will be asked to form a committee of at least three students and one non-voting faculty member, he said.

However, the permanent plan calls for student participation at both the department and college level. Department committees would create a "needs" list of expenditures

for the following fiscal year. A student committee at the college level would work with the dean to explore how each "need" list would be handled.

The English department is choosing to use the election process, said department head Douglass Keesey.

The students will choose who they want to represent them in deciding how to spend their money, he said.

Department Head Dianne Long said that in the political science department, students will be chosen from clubs to represent student suggestions.

Some students think that the clubs are the most informed and can make a better decision.

Pam Thiessen, a political science senior, said, "I would think that if the clubs are representative of the political science department, then they would be a good disbursement of opinions."

The department sent an e-mail survey to solicit information from political science students, Long said.

The math department has not decided how to proceed with forming

*"If the same people always participate in decision making, there would be no new ideas. This way, students who are less involved can help decide how their money will be spent."*

**Camille Robertson**  
agribusiness senior

committees, Department Head Kent Morrison said.

However, an advisory body of students from the Math Club and Kappa Mu Epsilon, which usually helps in curriculum-related decisions, could possibly be chosen to represent the math department, he said.

Some math students feel that this is a fair way to proceed with the committee.

"I think the (Math Club members) are more familiar with the issues," said Amber Siros, a math senior. "And the people who would run for election would be the same anyway."

Economics Department Head Alden Shiers said they will solicit as

much input as possible from students, but would not guarantee a percentage of student involvement.

"We have an Econ Club and we'll ask them what their feelings are," he said. "And how they would allocate the funds."

The Econ Club is just getting started again, Shiers said. The last time the club was active was in 1998.

Some business and economics students feel that an election process would be fairer.

"I would think that if students who are not in the new Econ Club want to have a say on how their money will be spent, they should," said Kelly Romain, a business student. "I would want to vote for my representative."

## AGREEMENT

continued from page 1

ers, Foroohar said.

Improvements in working conditions were key to the new contract, Fetzer said. Those improvements include lengthening long-term lecturer contracts to three years instead of two, improving family and pregnancy leave and bettering health insurance for lecturers, many of whom did not have access to such insurance under previous contracts.

Lecturers holding three-year appointments may now expect a subsequent contract of the same length barring any documented performance problems, according to a summary of the agreement.

The resolution came following increased pressure on Reed to settle the issue before CSU faculty went on strike. Several demonstrations were held throughout the state, Foroohar said, indicating the severity of the faculty's discontent.

"Some of our campuses were definitely ready to go," she said.

While many of these enhancements were geared toward improving working conditions for full- and part-time lecturers, they will have positive effects for both tenure and non-tenure track faculty and counselors, Fetzer said.

Copies of the proposed contract will be available in the Academic Senate office, building 38, room 141, later this week. A faculty forum will be held March 13 to discuss possible ramifications of the resolution.

## Career Services'

# SUMMER CAMPS & RESORTS JOB FAIR

Thursday, March 7, 2002  
Chumash Auditorium  
10:00 a.m. - 1:00 p.m.

Ability First/Camp Joan Meier - Bearskin Meadow Camp/Diabetic Youth Foundation - Cal Poly Jump Start Program - Cal Poly ROTC - Camp Concord - Camp Fire Boys & Girls of the Central Coast - Camp Hammer - Camp LaJolla - Camp Max Straus - Camp Oakhurst - Camp Redwood Glen/Salvation Army - Cottontail Ranch Camp - Four Seasons Biltmore Resort - Frontier Pack Train - Girl Scout Camps - Gold Arrow Camps - Harrah's/Harvey's Lake Tahoe Resorts/Casinos - Kennolyn Camps - Lindamood-Bell Learning Processes - Mission Springs Christian Camps - Montecito-Sequoia Family Camp & Resort - Monterey Co. Parks - Morning Star Trucking Co. - Morro Bay Parks & Recreation Dept. - Mount Hermon Association - Mountain Meadow Ranch - Skylake Yosemite Camp - River Way Ranch Camp - Roughing It Day Camp - SLO County Parks - SLO County YMCA - Snow Mountain Camp - Space Endeavour Camp - Sugar Pine Christian Camps - Yosemite Concession Services

- Summer camp counselors, lifeguards, activity leaders (all types of land & water sports, arts & crafts, music, drama, nature exploration, ropes course, hiking, backpacking, etc.), and equestrian staff (wranglers, riding instructors, day trip guides).
- Work with children ages 7-17 (including underprivileged children, children & adults with disabilities, and children learning to manage diabetes).
  - Resort & casino staff.
  - Academic tutors and program staff.
  - and more!

Great summer jobs in great places like Yosemite, Lake Tahoe, Malibu, La Jolla, the Santa Cruz Mountains, San Luis Obispo & Santa Barbara.

See job descriptions for these and other opportunities in Mustang Jobs

## TOURNEY

continued from page 12

for Poly to swallow. They held Hull and Ndiaye in check and had a season-high 22 points from senior forward David Henry, but still managed to lose the game. Henry made five shots from beyond the three-point arch to give the Mustangs a nine point lead with a pair of free throws with 5:47 left in the game. But Santa Barbara mounted a charge and went on a 17-5 run in the final five and a half minutes to ice a 69-66 victory. Branduinn Fullove emerged as the hero for the Gauchos with 29 points, including five three-pointers of his own.

On the women's side of the tournament, No. 1 seed UC Santa Barbara (16-0) is favored to win its sixth straight conference title. The Gauchos will also look to add to their 24-game conference winning streak dating back to last season. Led by Big West Player of the Year Kayte Christensen, Santa Barbara will take on eighth-seeded Cal State Fullerton (2-14).

The Cal Poly women (7-9) will compete in their third Big West Conference Tournament as the fifth seed. They play fourth-seeded Long Beach State (11-5) tonight at 8:30 p.m.

The teams split the season series with both clubs winning at home.

Cal Poly will look to get revenge on the 49ers. Last year, Long Beach knocked the Mustangs out of the tournament in the second round with a demoralizing 25-point victory, winning by a final score of 93-68. Long Beach went on to the conference championship game, just as they had the previous two years, but lost to Santa Barbara.

Unlike the men's team, Cal Poly's women's team finished the regular season strongly, winning three out of its last four, including a victory against Long Beach in the team's final home game on Feb. 24. In a game that saw 57 turnovers, 30 of them committed by Poly, the Mustangs emerged victorious. Senior guard Odessa Jenkins led the team with 16 points and six rebounds in the 67-64 victory over Long Beach. Kari Duperron was right behind Jenkins with 15 points and six boards of her own. Catrina Taylor also was in double figures with 12 points.

In the two games with the Mustangs this year, Long Beach senior forward Crystal Givens had monster games, averaging 20 points and 16 rebounds. All-Conference first team member Ekuah Ramsey also provides a dangerous presence for the Mustang defense.

## COLUMN

continued from page 12

now couldn't make me happier because it has been a great year to be a fan from Oregon. The University of Oregon lived up to its promise in football (don't even get me started on the BCS), and now has surprised everyone by winning the Pac-10 regular season in basketball for the first time since my grandmother attended U of O. Not only that, but the team ranks in the top 10 for the first time since my dad attended the school. Oregon has made its impressive run by vastly improving its defense, playing solid man-to-man against anyone in the country. Offensively, Oregon has all the parts in place for a traditional team. Huge 7-foot-two-inch center Chris Christofferson holds down the middle,

and Robert Johnson provides a rebounding presence. Big time scoring comes from forward Luke Jackson and explosive athletic two guard Freddie Jones, who's a highlight reel all by himself. A pure ball handler in Luke Ridnour helps get the ball up the court faster than any team in the nation, and sixth man Anthony Lever leads the league in three-point shooting. Oregon will surprise many teams, and it's my favorite dark horse candidate to advance to the Final Four, if not the Championship game. Two words: Go Ducks.

Another team that's not a dark horse anymore is Gonzaga. Gonzaga played Cinderella for the last three years by winning the West Coast Conference and then streaking to the Sweet Sixteen with big upsets. This year, it'll be the favorite, perhaps seeded as high as No. 2 or No. 3 in its bracket, so the team won't

sneak up on anyone. Still, with the high-powered offense led by Dan Dickau and a formidable inside game with Zach Gourde, they match up well with anyone. I bet Pac-10 eighth seed Washington is kicking itself for letting Dickau transfer. The Bulldogs (no, their official name isn't the Zags) get the ball up the court and score in transition, just like the Ducks. This team will contend, count on it.

There are some big hurdles to this scenario; Duke, Maryland, and No. 1 Kansas, for instance, but I for one would love to see Oregon and Gonzaga shake up the traditional basketball powers. So, sit back, relax, and hold on for March Madness.

## HOWARD

continued from page 12

Goodrich's adjustment to playing basketball and living on the campus has been relatively smooth. That doesn't surprise him.

"When I walked into the classroom for the first time, everybody's eyes lit up," he said. "It was like, 'What is he doing here?' But now that they know me, it's like nothing. I haven't had any conflicts whatsoever. I feel like I fit in really well."

Goodrich has always fit in. He grew up in a suburb south of Baltimore and played basketball 15 miles away on the urban courts of West Baltimore, where "we were always the only white people in the gym," said Gil Jr., a truck driver.

"I haven't had any conflicts whatsoever. I feel like I fit in really well."

Gil Goodrich

Howard University point guard

It was there, on the courts of the Robert C. Marshall and Oliver recreation centers, where Goodrich played alongside Keith Jenifer (Virginia) and Melvin Scott (North Carolina), that he developed his flashy playing style and never-back-down attitude. Goodrich says he patterns his game after Jason Williams of the NBA's Memphis Grizzlies, and he even shares Williams' nickname — White Chocolate.

"He's been around black people

his whole life," said Goodrich's father, who's been an assistant high school basketball coach for 20 years. "Both of us have more black friends than white friends. I guess that's part of being around the game of basketball in Baltimore."

Teammates pointed to Goodrich's overall value to the team.

"They didn't go out and get him because they thought he needed a white player," said Goodrich's back-court mate, Ron Williamson. "They went out and got him because he's good."

Goodrich still gets some good-natured ribbing. In addition to "White Chocolate," teammates occasionally dub him "Milk." Their jokes don't hurt his feelings, he says, but rather help him feel accepted. "I would be worried if they didn't joke around with me," he said.

# Anaheim or bust for basketball teams

FILE PHOTO/MUSTANG DAILY

Cal Poly guard Odessa Jenkins goes up for a layup during a game on Feb. 17. The Mustangs play today at the Big West Conference.

## Men's team will have to face rival UCSB in first round

By Andy Fahey  
MUSTANG DAILY CONTRIBUTOR

Multiple Cinderellas will be trying on the glass slipper this week in Anaheim, but most will go home disappointed that the shoe didn't fit.

The Big West Basketball Tournament tips off Wednesday at the Anaheim Convention Center Arena with the women's quarterfinals. The men's tournament will begin Thursday. The winners of both tournaments will earn automatic bids to the NCAA Tournament.

Utah State (13-5) enters the men's tournament with the top seed under the direction of Big West Coach of the Year Stew Morrill. Morrill hopes to lead the Aggies to their third straight conference championship and NCAA appearance. Last year, they advanced to the second round with a win over Ohio State before being knocked out by UCLA. Utah State will play eighth-seeded Idaho (6-12) in Thursday's first round action. The victor will go on to play the winner of the game between No. 4 Pacific and No. 5 Cal State Fullerton.

The Cal Poly men's team earned the sixth seed in the tournament with a 9-9 conference record. It will take on third-seeded UC Santa Barbara (11-7) in the first round Thursday at 8:30 p.m. The winner of that game will advance to Friday's semifinals and play the winner of the match between No. 2 UC Irvine and No. 7 Long Beach State. The conference championship will be

held on Saturday at 9 p.m. and can be seen on ESPN.

The Mustangs have been struggling as of late, losing four out of their last five. Despite the recent losses, All-Conference Honorable Mention and senior forward Brandon Beeson has put the past behind him.

"(The Big West Tournament) is a whole new season," Beeson said. "The whole season has been up and down. It's down right now and here's our chance to bring it back up again."

The Mustangs will enter Thursday's match-up hoping the third time's the charm, as they lost both of their meetings with their Central Coast rival this year, and eight straight games overall. The Gauchos are the only team in the Big West that Cal Poly hasn't beaten.

In the first contest between the two teams, Gaucho forward Adama Ndiaye had his way with the Mustang defense, scoring a career-high 31 points on 13 of 18 shooting. Mark Hull also had a big game, knocking down four three pointers and scoring 22 en route to a 74-67 Santa Barbara victory at Mott Gym in January. All-Conference second team sophomore Varnie Dennis did all he could to keep Cal Poly in the game with 27 points, but his performance could not make up for the team's dismal outside shooting performance. The team went just four of 27 from three-point range.

The second game was also a hard pill

see **TOURNEY**, page 11

## Dark horse teams make us feel 'mad'

March in San Luis Obispo usually comes in like a lamb, and it was gorgeous last Friday, but it always goes out like a lion with March Madness. Championship week heats up even more as this week goes along, with the newly reinvented Pac-10 Championship Tournament starting Thursday, and

### Commentary

Big West tournament tipping off in Anaheim as well.

Many hardcore college hoops fans, and the fair weather fans who only watch basketball in March, will soon be treated to the intensity of one of the most exciting tournaments of the sports world. I'm already excited for the Big Dance.

Unfortunately, Cal Poly allegiances aside, we're not going anywhere in the Big Dance unless we come out of nowhere to win the Big West tourney. However, I'm going to run through the two teams that I want to see in the Final Four, and that have a shot at winning it all.

The No. 1 'dark horse' right

## New 'White Chocolate' is first white basketball player at Howard University

By Tarik El-Bashir  
THE WASHINGTON POST

(WIRE) WASHINGTON — It sounds like an easy enough assignment for a class of Howard University freshmen: Write a one-page essay about what it's like to be an African American in the 21st century. Easy, that is, for everyone in the class except Gil Goodrich, the first white basketball player in Howard's history, according to the school's athletic department.

"I went to the teacher to ask what I should do," said Goodrich, a 5-foot-11 point guard. "I was told to just pretend I was black. It was the hardest paper I ever had to do. I needed a lot of help from my friends. But I guess I did a good job because I got an 'A' in the class."

Goodrich, 19, a first-rate passer with a fine crossover dribble, is thriving on the court as well. He became a starter Feb. 11, when Coach Frankie Allen decided his lineup was in need of tweaking. Howard is 4-2 with Goodrich at the helm, and the freshman is averaging 6.5 points and 4.3 assists since becoming a starter, helping the Bison (16-12) to its best record since 1991-92.

Goodrich is three victories from living his childhood dream — helping direct a Division I basketball team to the NCAA tournament.

The Bison can earn an automatic bid by winning the Mid-Eastern Athletic Conference tournament; Howard, 11-7 in the conference, earned a first-round bye and plays Thursday in the quarterfinals in Richmond.

Howard, one of the nation's traditionally black universities, had a total enrollment of 10,690 last year; of that figure, only 1.3 percent was white, according to the school.

Goodrich's father, Gil Jr. (the player is Gil III) and his son were approached last year by Howard assistant coach Aki Collins after one of his son's games at Newport Prep in Kensington, Md., where Goodrich started for a nationally recognized team.

"Coach Collins introduced himself and told me that he was really interested in Gil," the father said. "He explained to me that Howard was a predominantly black school. ... I never gave it a second thought. I knew it would not be an issue for Gil."

The coach was also positive about Gil's presence on the team.

"We did our homework before approaching him, just to see if he would be receptive to the idea of coming here," Allen said. "Once we got to know him, we realized he wouldn't have any problem fitting in here. We put everything on the

table. I told him that I didn't think he'd have any problems in D.C., but I didn't know how people would react in other cities."

With his family's backing, Goodrich chose Howard over La Salle and Richmond. La Salle had been Goodrich's first choice, but he changed his mind when the program switched coaches.

"I wasn't sure I wanted to go there at first," Goodrich said. "All I knew about Howard was what other people had told me, about them winning one game and there being problems with the old coach and stuff like that. But after I got to know the coaches, I started to feel like it was the best place for me to go."

When Goodrich arrived last fall, Allen was in the midst of bringing the program back from a two-season stretch during which the Bison went 3-52 and were placed on two-year NCAA probation for rules infractions under previous coach Kirk Saulny, who was fired Jan. 7, 2000. The Bison were 10-18 in Allen's first season, and now are the No. 3 seed in the conference tournament.

"My first goal was to become a starter," Goodrich said. "My second goal is to get to the NCAAs and experience March Madness."

## Jeter finds spring training a pain in the neck

By Ken Davidoff

NEWSDAY

(WIRE) TAMPA, Fla. — By the time Derek Jeter spoke to reporters early Monday afternoon, he had removed his neck brace. But his uncomfortable walk through the New York Yankees' clubhouse gave away enough, and for the second consecutive year, the shortstop has caught the injury bug.

The team's highest-paid player has a muscle strain in his neck, and he'll be out for at least five days. An X-ray and MRI both came back negative.

Jeter said he first tweaked his neck Saturday when he took off after a flare into short center field during a game against the Toronto Blue Jays. He didn't have to go to Kissimmee on Sunday for the Yankees' game against the Houston Astros, but while taking batting practice at Legends Field, he aggravated the neck injury and reported it to the team's training staff. "It's almost like a charley horse," Jeter said. "I can go right but can't go left too well."

There is minimal concern for Jeter at the moment, and yet there is the lesson from his adventures last year: Even the most innocuous injury can snowball. Jeter and Joe Torre voiced similar optimism during last year's spring training when the shortstop went down with a sore right shoulder. That kept him out of action for a couple of weeks, however, and after playing five games, he strained his right quadriceps when he tried to turn up his speed prematurely.

Torre shook off comparisons to Jeter's 2001 woes, saying, "I don't think it's the same thing. This is muscular. ... The results were good, and it's just a matter of sitting down for five days. He'll catch up pretty quick."
